NOBEL PRIZES

Facts

- On 27 November 1895, Alfred Nobel signed his last will and testament, giving the largest share of his fortune to a series of prizes in Physics, Chemistry, Physiology or Medicine, Literature and Peace - the Nobel Prizes. In 1968, Sveriges Riksbank (Sweden's central bank) established The Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel.
- Between 1901 and 2014, the Nobel Prizes and the Prize in Economic Sciences were awarded 567 times.
- 900 Nobel Laureates. 874 Laureates and 26 organizations have been awarded the Nobel Prize between 1901 and 2015. Of them, 76 are Laureates in Economic Sciences. A small number of individuals and organizations have been honoured more than once, which means that 870 individuals and 23 unique organizations have received the Nobel Prize in total.
- Since the start, in 1901, there are some years when the Nobel Prizes have not been awarded. The total number of times are 49. Most of them during World War I (1914-1918) and II (1939-1945). In the statutes of the Nobel Foundation it says: "If none of the works under consideration is found to be of the importance indicated in the first paragraph, the prize money shall be reserved until the following year. If, even then, the prize cannot be awarded, the amount shall be added to the Foundation's restricted funds."
- The Youngest Nobel Laureates at the age of 17 years is Malala Yousafzai from Pakistan.
- The Oldest Nobel Laureates is Leonid Hurwicz who got Award in Economic Sciences 2007.
- Between 1901 and 2014 the Nobel Prize and Prize in Economic Sciences have been awarded 47 times to women.
- **Two Nobel Laureates Declined the Prize:** Jean-Paul Sartre, awarded the 1964 Nobel Prize in Literature, declined the prize because he had consistently declined all official honours. Le Duc Tho, awarded the 1973 Nobel Peace Prize jointly with US Secretary of State Henry Kissinger. They were awarded the Prize for negotiating the Vietnam peace accord. Le Duc Tho said that he was not in a position to accept the Nobel Peace Prize, citing the situation in Vietnam as his reason.
- **Forced to Decline the Nobel Prize!:** Four Nobel Laureates have been forced by authorities to decline the Nobel Prize. Adolf Hitler forbade three German Nobel Laureates, Richard Kuhn, Adolf Butenandt and Gerhard Domagk, from accepting the Nobel Prize. All of them could later receive the Nobel Prize Diploma and Medal, but not the prize amount. Boris Pasternak, the 1958 Nobel Laureate in Literature, initially accepted the Nobel Prize but was later coerced by the authorities of the Soviet Union, his native country, to decline the Nobel Prize.
- **Nobel Laureates under Arrest at the Time of the Award:** Three Nobel Laureates were under arrest at the time of the award of the Nobel Prize, all of them Nobel Peace Prize Laureates: German pacifist and journalist Carl von Ossietzky, Burmese politician Aung San Suu Kyi, Chinese human rights activist Liu Xiaobo.
- **Multiple Nobel Laureates:** The work of the International Committee of the Red Cross (ICRC) has been honoured by a Nobel Peace Prize three times. Besides, the founder of the ICRC, Henry Dunant, was awarded the first Nobel Peace Prize in 1901. Linus Pauling is the only person to have been awarded two unshared Nobel Prizes - the 1954 Nobel Prize in Chemistry and the 1962 Nobel Peace Prize.
- **Posthumous Nobel Prizes:** From 1974, the Statutes of the Nobel Foundation stipulate that a Prize cannot be awarded posthumously, unless death has occurred after the announcement of the Nobel Prize. Before 1974, the Nobel Prize has only been awarded posthumously twice: to Dag Hammarskjöld (Nobel Peace Prize 1961) and Erik Axel Karlfeldt (Nobel Prize in Literature 1931). Following the 2011 announcement of the Nobel Prize in Physiology or Medicine, it was discovered that one of the Medicine Laureates, Ralph Steinman, had passed away three days earlier. The Board of the Nobel Foundation examined the statutes, and an interpretation of the purpose of the rule above lead to the conclusion that Ralph Steinman should continue to remain a Nobel Laureate, as the Nobel Assembly at Karolinska Institutet had announced the 2011 Nobel Laureates in Physiology or Medicine without knowing of his death

- **"Family Nobel Laureates":** The Curies were a very successful 'Nobel Prize family' Marie Curie herself was awarded two Nobel Prizes
- **The Nobel Prize Insignias:** At the Nobel Prize Award Ceremonies on 10 December the Nobel Laureates receive three things: a Nobel Diploma, a Nobel Medal and a document confirming the Nobel Prize amount. Each Nobel Diploma is a unique work of art, created by foremost Swedish and Norwegian artists and calligraphers. The Nobel Medals are handmade with careful precision and in 18 carat green gold plated with 24 carat gold.
- **The Nobel Prize Amount:** Alfred Nobel left most of his estate, more than SEK 31 million (today approximately SEK 1,702 million) to be converted into a fund and invested in "safe securities." The income from the investments was to be "distributed annually in the form of prizes to those who during the preceding year have conferred the greatest benefit on mankind." The Nobel Prize amount for 2014 is set at Swedish kronor (SEK) 8.0 million per full Nobel Prize.

- Shale oil is an unconventional oil produced from oil shale rock fragments by pyrolysis, hydrogenation, or thermal dissolution. These processes convert the organic matter within the rock (kerogen) into synthetic oil and gas. The resulting oil can be used immediately as a fuel or upgraded to meet refinery feedstock specifications by adding hydrogen and removing impurities such as sulfur and nitrogen. The refined products can be used for the same purposes as those derived from crude oil.
- The term "shale oil" is interchangeable, as it is used as well for crude oil produced from shales of other very low permeability formations. However, for avoiding the risk of confusion of shale oil produced from oil shale with crude oil in oil-bearing shales, the International Energy Agency recommends to use the term "light tight oil" and World Energy Resources 2013 report by the World Energy Council uses the term "tight oil" for the latter. A sedimentary rock, oil shale is found all over the world, including China, Israel, and Russia. The United States, however, has the most shale resources.

PAKISTAN AFFAIRS

Pakistan, officially the Islamic Republic of Pakistan), is a country in South Asia. It is the sixth-most populous country with a population exceeding 212,742,631 people. In area, it is the 33rd-largest country, spanning 881,913 square kilometres (340,509 square miles)*. Pakistan has a 796,095 km² coastline along the Arabian Sea and Gulf of Oman in the south and is bordered by India to the east, Afghanistan to the west, Iran to the southwest, and China in the far northeast. It is separated narrowly from Tajikistan by Afghanistan's Wakhan Corridor in the northwest, and also shares a maritime border with Oman.

The territory that now constitutes Pakistan was the site of several ancient cultures, including the Mehrgarh of the Neolithic and the Bronze Age Indus Valley Civilisation, and was later home to kingdoms ruled by people of different faiths and cultures, including Hindus, Indo-Greeks, Muslims, Turco-Mongols, Afghans, and Sikhs. The area has been ruled by numerous empires and dynasties, including the Persian Achaemenid Empire, Alexander III of Macedon, the Seleucid Empire, the Indian Maurya Empire, the Gupta Empire, the Arab Umayyad Caliphate, the Delhi Sultanate, the Mongol Empire, the Mughal Empire, the Afghan Durrani Empire, the Sikh Empire (partially), and, most recently, the British Empire.

Pakistan is the only country to have been created in the name of Islam. As a result of the Pakistan Movement led by Muhammad Ali Jinnah and the Indian subcontinent's struggle for independence, Pakistan was created in 1947 as an independent homeland for Indian Muslims. It is an ethnically and linguistically diverse country, with a similarly diverse geography and wildlife. Initially a dominion, Pakistan adopted a constitution in 1956, becoming an Islamic republic. An ethnic civil war in 1971 resulted in the secession of East Pakistan as the new country of Bangladesh. In 1973 Pakistan adopted a new constitution establishing, alongside its pre-existing parliamentary republic status, a federal government based in Islamabad consisting of four provinces and three federal territories. The new constitution also stipulated that all laws are to conform to the injunctions of Islam as laid down in the Quran and Sunnah.

A regional and middle power, Pakistan has the sixth-largest standing armed forces in the world and is also a nuclear power as well as a declared nuclear-weapons state, the second in South Asia and the only nation in the Muslim world to have that status. Pakistan has a semi-industrialised economy with a well-integrated agriculture sector and a growing services sector. The Pakistani economy is the 24th-largest in the world in terms of purchasing power and the 41st-largest in terms of nominal GDP (World Bank). It is ranked among the emerging and growth-leading economies of the world, and is backed by one of the world's largest and fastest-growing middle class.

Pakistan's political history since independence has been characterized by periods of military rule, political instability and conflicts with India. The country continues to face challenging problems, including overpopulation, terrorism, poverty, illiteracy, and corruption. Pakistan is a member of the United Nations, the Shanghai Cooperation Organisation, the Non

BALOCHISTAN
Balochistan (also Baluchistan or Baluchestan, often interpreted as the Land of the Baloch) is an arid desert and mountainous region in south-western Asia. It comprises the Pakistani province of Balochistan, Iranian province of Sistan and Baluchestan, and the southern areas of Afghanistan including Nimruz, Helmand and Kandahar provinces. Balochistan borders the Pashtunistan region to the north, Sindh and Punjab to the east, and Persian regions to the west. South of its southern coastline, including the Makran Coast, are the Arabian Sea and the Gulf of Oman.

The earliest evidence of human occupation in what is now Balochistan is dated to the Paleolithic era, represented by hunting camps and lithic scatters, chipped and flaked stone tools. The earliest settled villages in the region date to the ceramic Neolithic (c. 7000–6000 BCE) and included the site of Mehrgarh in the Kachi Plain. These villages expanded in size during the subsequent Chalcolithic, when interaction was amplified. This involved the movement of finished goods and raw materials, including chank shell, lapis lazuli, turquoise, and ceramics. By 2500 BCE (the Bronze Age), the region now known as Pakistani Balochistan had become part of the Harappan cultural orbit, providing key resources to the expansive settlements of the Indus river basin to the east.

From the 1st century to the 3rd century CE, the region was ruled by the Pāratarājas (lit. "Pārada Kings"), a dynasty of Indo-Scythian or Indo-Parthian kings. The dynasty of the Pāradas is thought to be identical with the Paradas of the Mahabharata, the Puranas and other Vedic and Iranian sources. The Parada kings are primarily known through their coins, which typically exhibit the bust of the ruler (with long hair in a headband) on the obverse, and a swastika within a circular legend on the reverse, written in Brahmi (usually silver coins) or Kharoshthi (copper coins). These coins are mainly found in Loralai in today's western Pakistan.

Herodotus in 450 BCE described the Paraitakenoi as a tribe ruled by Deiokes, a Persian king, in northwestern Persia. Arrian describes how Alexander the Great encountered the Pareitakai in Bactria and Sogdiana, and had them conquered by Craterus (Anabasis Alexandrou IV). The Periplus of the Erythraean Sea (1st century CE) describes the territory of the Paradon beyond the Ommanitic region, on the coast of modern Balochistan.

The region was fully Islamized by the 9th century and became part of the territory of the Saffarids of Zaranj, followed by the Ghaznavids, then the Ghorids. Ahmad Shah Durrani made it part of the Afghan Empire in 1749. In 1758 the Khan of Kalat, Mir Noori Naseer Khan Baloch, revolted against Ahmad Shah Durrani, defeated him, and freed Balochistan, winning complete independence.

PUNJAB

The region was originally called Sapta Sindhu, the Vedic land of the seven rivers flowing into the ocean. The Sanskrit name for the region, as mentioned in the Ramayana and Mahabharata for example, was Panchanada which means "Land of the Five Rivers", and was translated to Persian as Punjab after the Muslim conquests. The later name of the region, Punjab, is a compound of two Persian words, Panj (five) and āb (water), introduced to the region by the Turko-Persian conquerors of India, and more formally popularised during the Mughal Empire. Punjab thus means "The Land of Five Waters", referring to the rivers Jhelum, Chenab, Ravi, Sutlej, and Beas. All are tributaries of the Indus River, the Chenab being the largest.

History

The Punjab region of India and Pakistan has a historical and cultural link to Indo-Aryan peoples as well as partially to various indigenous communities. As a result of several invasions from Central Asia and the Middle East, many ethnic groups and religions make up the cultural heritage of the Punjab.

In prehistoric times, one of the earliest known cultures of South Asia, the Indus Valley civilisation was located in the region

The epic battles described in the Mahabharata are described as being fought in what is now the State of Haryana and historic Punjab. The Gandharas, Kambojas, Trigartas, Andhra, Pauravas, Bahlikas (Bactrian settlers of the Punjab), Yaudheyas and others sided with the Kauravas in the great battle fought at Kurukshetra. According to Dr Fauja Singh and Dr L. M. Joshi: "There is no doubt that the Kambojas, Daradas, Kaikayas, Andhra, Pauravas, Yaudheyas, Malavas, Saindhavas and Kurus had jointly contributed to the heroic tradition and composite culture of ancient Punjab".]

Menander I Soter (165/155 –130 BCE), conqueror of the Punjab, carved out a Greek kingdom in the Punjab and ruled the Punjab until his death in 130 BC.

In 326 BCE, Alexander the Great invaded Pauravas and defeated King Porus. His armies entered the region via the Hindu Kush in northwest Pakistan and his rule extended up to the city of Sagala (present-day Sialkot in northeast Pakistan). In 305 BCE the area was ruled by the Maurya Empire. In a long line of succeeding rulers of the area, Chandragupta Maurya and Ashoka stand out as the most renowned. The Maurya presence in the area was then consolidated in the Indo-Greek Kingdom in 180 BCE. Menander I Soter "The Saviour" (known as Milinda in Indian sources) is the most renowned leader of the era, he conquered the Punjab and made Sagala the capital of his Empire.[30] Menander carved out a Greek kingdom in the Punjab and ruled the region till his death in 130 BCE. The neighbouring Seleucid Empire rule came to an end around 12 BCE, after several invasions by the Yuezhi and the Scythian people.

In 711–713 CE, the 18-year-old Arab general Muhammad bin Qasim of Taif, a city in what is now Saudi Arabia, came by way of the Arabian Sea with Arab troops to defeat Raja Dahir. Bin Qasim then led his troops to conquer the Sindh and Punjab regions for the Islamic Umayyad Caliphate, making him the first to bring Islam to the region.

During the establishment and consolidation of the Muslim Turkic Mughal Empire prosperity, growth, and relative peace were established, particularly under the reign of Jahangir. Muslim empires ruled the Punjab for approximately 1,000 years. The period was also notable for the emergence of Guru Nanak (1469–1539), the founder of Sikhism.

In 1758, Punjab came under the rule of Marathas, who captured the region by defeating the Afghan forces of Ahmad Shah Abdali. Abdali's Indian invasion weakened the Maratha influence, but he could not defeat the Sikhs. After the death of Ahmad Shah, the Punjab was freed from the Afghan yoke by Sikhs between 1773 and 1818. At the time of the formation of the Dal Khalsa in 1748 at Amritsar, the Punjab had been divided into 36 areas and 12 separate Sikh principalities, called misl. From this point onward, the

SINDH

Sindh is one of the four provinces of Pakistan, in the southeast of the country. Historically home to the Sindhi people, it is also locally known as the Valley of Mehran. Sindh is the third largest province of Pakistan by area, and second largest province by population after Punjab. Sindh is bordered by Balochistan province to the west, and Punjab province to the north. Sindh also borders the Indian states of Gujarat and Rajasthan to the east, and Arabian Sea to the south. Sindh's landscape consists mostly of alluvial plains flanking the Indus River, the Thar desert in the eastern portion of the province closest to the border with India, and the Kirthar Mountains in the western part of Sindh. Sindh's climate is noted for hot summers and mild winters. The provincial capital of Sindh is Karachi, Pakistan's largest city and financial hub.

Sindh has Pakistan's second largest economy. Karachi hosts the headquarters of several multinational banks. Sindh is home to a large portion of Pakistan's industrial sector and contains two of Pakistan's commercial seaports, Port Bin Qasim and the Karachi Port. The remainder of Sindh has an agriculture based economy, and produces fruit, food consumer items, and vegetables for the consumption of other parts of the country. Sindh is also the centre of Pakistan's pharmaceutical industry.

Sindh is known for its distinct culture which is strongly influenced by Sufism, an important marker of Sindhi identity for both Hindus (Sindh has Pakistan's highest percentage of Hindu residents) and Muslims in the province. Several important Sufi shrines are located throughout the province which attract millions of annual devotees.

Sindh's capital, Karachi, is Pakistan's most ethnically diverse city, with Muhajirs, or descendants of those who migrated to Pakistan from India after 1947 and throughout the 1950s and 1960s, making up the majority of the population. Karachi and other urban centres of Sindh have seen ethnic tensions between the native Sindhis and the Muhajirs boil over into violence on several occasions. Sindh is home to two UNESCO World Heritage Sites – the Historical Monuments at Makli, and the Archaeological Ruins at Moenjodaro.

(Paper 2)
KHYBER-PAKHTUNKHWA

Khyber Pakhtunkhwa (abbreviated as KP or KPK) is one of the four administrative provinces of Pakistan, located in the northwestern region of the country along the international border with Afghanistan. It was previously known as the North-West Frontier Province (NWFP) until 2010, and is known colloquially by various other names. Khyber Pakhtunkhwa is the third-largest province of Pakistan by the size of both population and economy, though it is geographically the smallest of five.(3) Within Pakistan, Khyber Pakhtunkhwa shares a border with Punjab, Balochistan, Azad Kashmir, Gilgit-Baltistan, and Islamabad. It comprises 10.5% of Pakistan's economy, and is home to 11.9% of Pakistan's total population, with the majority of the province's inhabitants being Pashtuns. The province is the site of the ancient kingdom Gandhara, including the ruins of its capital Pushkalavati near modern-day Charsadda. Originally a stronghold of Buddhism, the history of the region was characterized by frequent invasions under various Empires due to its geographical proximity to the Khyber Pass.

Since the 9/11 attacks in the United States in 2001, the Khyber Pakhtunkhwa has been a major theatre of militancy and terrorism which intensified when the Taliban began an unsuccessful attempt to seize the control of the province in 2004. With the launch of Operation Zarb-e-Azb against the Taliban insurgency, the casualty and crime rates in the country as a whole dropped by 40.0% as compared to 2011–13, with even greater drops noted in Khyber Pakhtunkhwa and the Federally Administered Tribal Areas. As of July 2014, about 929,859 people were reported to be internally displaced from North Waziristan to Khyber Pakhtunkhwa as a result of Operation Zarb-e-Azb.

On March 2, 2017, the Government of Pakistan considered a proposal to merge the Federally Administered Tribal Areas with Khyber Pakhtunkhwa, and to repeal the Frontier Crimes Regulations, which are currently applicable to the tribal areas. However, some political parties have opposed the merger, and called for the tribal areas to instead become a separate province of Pakistan. On 24 May 2018, the National Assembly of Pakistan voted in favour of an amendment to the Constitution of Pakistan to merge the Federally Administered Tribal Areas with Khyber Pakhtunkhwa province. The Khyber Pakhtunkhwa Assembly then approved the historic FATA-KP merger bill on 28 May 2018 making FATA officially part of Khyber Pakhtunkhwa, which was then signed by President Mamnoon Hussain that completes the process of this historic merger. On 24 May 2018, the National Assembly of Pakistan voted in favour of an amendment to the Constitution of Pakistan for the FATA-KP merger which was approved by the Senate the following day. Since the change was to affect the province of Khyber Pakhtunkhwa, it was presented for approval in the Khyber Pakhtunkhwa Assembly on 27 May 2018, and passed with majority vote. On 28 May 2018, the President of Pakistan signed the FATA Interim Governance Regulation, a set of interim rules for FATA until it merges with Khyber Pakhtunkhwa within a timeframe of two years. At present districts in KPK are 26. After merger of FATA there will be 34 distiricts in KPK.

The 25th Amendment received assent from President Mamnoon Hussain on 31 May 2018, after which FATA was officially merged with Khyber Pakhtunkhwa.

NORTHERN AREAS

Gilgit-Baltistan, formerly known as the Northern Areas, is the northernmost administrative territory in Pakistan. It borders Azad Kashmir to the south, the province of Khyber Pakhtunkhwa to the west, the Wakhan Corridor of Afghanistan to the north, the Xinjiang region of China, to the east and northeast, and the Indian-administered state of Jammu and Kashmir to the southeast. According to UNSC Resolution of 1947 the territory is part of the disputed Kashmir region along with Azad Kashmir, Aksai Chin, the Shaksgam Valley, and Jammu, Ladakh, and the Valley of Kashmir.

The territory of present-day Gilgit-Baltistan became a separate administrative unit in 1970 under the name "Northern Areas". It was formed by the amalgamation of the former Gilgit Agency, the Baltistan district and several small former princely states, the larger of which being Hunza and Nagar. In 2009, it was granted limited autonomy and renamed to Gilgit-Baltistan via the Self-Governance Order signed by Pakistan president Asif Ali Zardari, which also aimed to empower the people of Gilgit-Baltistan. However, scholars state that the real power rests with the governor and not with chief minister or elected assembly. The population of Gilgit-Baltistan wants to be merged into Pakistan as a separate fifth province and opposes integration with Kashmir. The Pakistani government has rejected Gilgit-Baltistani calls for integration with Pakistan on the grounds that it would jeopardise its demands for the whole Kashmir issue to be resolved according to UN resolutions.

Gilgit-Baltistan covers an area of over 72,971 km² (28,174 sq mi) and is highly mountainous. It had an estimated population of 1,800,000 in 2015. Its capital city is Gilgit (population 216,760 est). Gilgit-Baltistan is home to five of the "eight-thousanders" and to more than fifty peaks above 7,000 metres (23,000 ft). Three of the world's longest glaciers outside the polar regions are found in Gilgit-Baltistan. Tourism is mostly in trekking and mountaineering, and this industry is growing in importance.

HIGHEST MOUNTAINS AND GLACIERS IN THE PAKISTAN

Pakistan is home to 108 peaks above 7,000 metres and probably as many peaks above 6,000 m. There is no count of the peaks above 5,000 and 4,000 m. Five of the 14 highest independent peaks in the world (the eight-thousanders) are in Pakistan (four of which lie in the surroundings of Concordia, the confluence of Baltoro Glacier and Godwin Austen Glacier). Most of the highest peaks in Pakistan lie in the Karakoram mountain range (which lies almost entirely in the Gilgit–Baltistan region of Pakistan, and is considered to be a part of the greater Himalayan range) but some peaks above 7,000 m are included in the Himalayan and Hindu Kush ranges.

Most of the highest mountains in Pakistan are located in the Karakoram Range (the highest of which is K2, globally ranked 2nd, 8611m), some high mountains are in Himalaya (the highest of which is Nanga Parbat, globally ranked 9th, 8126 m) and Hindu Kush (the highest of which is Tirich Mir, globally ranked 33rd, 7708 m).

The locations of the highest mountains are shown on the composite satellite image of Karakoram and Hindu Kush below. The numbers refer to the global ranking in this "List of highest mountains". For clarity, lower peaks with labels overlapping higher peaks are left out of the main image.

Most of the high peaks in Pakistan lie specifically in Gilgit–Baltistan with the exception of a few 7,000+ m peaks in the high Hindu Kush (the peaks marked in the northwest most region of Pakistan).

The peak marked as number 9 is Nanga Parbat (8,125 m), which is the 2nd highest Himalayan peak in Pakistan. All other peaks above 8,000m are in the Baltoro Muztagh subrange of Karakoram.

CORRECT/INCORRECT

Sentence Correction

Directions: In this part questions test your recognition of correct grammatical usage and your sense of clear and economical writing style. Choose answers according to the norms of standard written English for grammar, word choice, and sentence construction. Your selected answer should express the intended meaning of the original sentence as clearly and precisely as possible, while avoiding ambiguous, awkward, or unnecessarily wordy constructions.

Most Popular Question Areas

The Sentence Correction section primarily tests six major categories of standard written English:

a) Pronoun Errors

b) Subject & Verb Agreement

c) Modifiers

d) Parallelism

e) Verb Tense

f) Faulty Use of Words

a) Pronoun Errors

A pronoun is a word that stands for a noun, known as the antecedent of the pronoun. Pronouns must agree with their antecedent in both number (singular or plural) and person (1st, 2nd, 3rd, etc.).

Example: Naurin is waiting to pick up her dry leaning.

he pronoun Her refers to the noun Naurin.

he most common pronouns in standard English clude:

Singular:

I, me she, her he, him it
anyone either each
many a nothing one another
everything mine
his, hers this that

Plural:

we, us they them these
those
some that both
ourselves any many
few several others

Both Singular and Plural:

any none all
most more
who which what you

Singular:

I, me she, her he, him
it anyone either
each many a nothing
one another
everything mine his, hers this
that

Plural:

we, us they them these
those
some that both
ourselves any many few
several others

Both Singular and Plural:

any none all most what more you who which

Basic Pronoun Rules

1) Pronouns should be singular when referring to one noun and plural when referring to nouns joined by and.

Example Roohi and Ali believe they won the lottery

The plural pronoun they refer to the compound subject Roohi and Ali

2) A pronoun should be singular when it refers to two nouns joined by or or nor.

Incorrect. Neither Roohi nor Ali believes they won the lottery

Correct Neither Roohi nor Ali believes she won the lottery

3) A pronoun should refer to one and only one noun or compound noun. This is the most common error in test questions. If a pronoun follows two nouns, it is often unclear which of the nouns the pronoun refers to.

Incorrect The destabilization of the economy has left unstable stocks in the hands of frightened investors. It is imperative that they be more tightly controlled.

Should the unstable stocks be controlled or the frightened investors? Either interpretation is possible from the structure of the sentence.

Correct: The destabilization of the economy has left unstable stocks in the hands of frightened investors. It is imperative that the unstable stocks be more tightly controlled.

Incorrect: In Europe, they use perfume judiciously.

This construction is incorrect because the pronoun does not have an antecedent. The sentence needs a noun, rather than a pronoun.

Correct: In Europe, women use perfume judiciously.

Correct: European women use perfume judiciously.

4) A pronoun must also agree with its antecedent in person.

Incorrect: One enters the university with no friends. Then comes the stress of classes, choosing a major and qualifying for financial aid. No wonder you long to quit school!

The subject of the sentence changed from one (third person) to you (second person).

Correct. One enters the university with no friends. Then comes the stress of classes, choosing a major and qualifying for financial aid. No wonder one longs to quit school!

Correct You enter the university with no friends. Then comes the stress of classes, choosing a major and qualifying for financial aid. No wonder you long to quit school!

b) Subject & Verb Agreement

1) The subject and verb must agree in number and person.

Both of the following sentences are correct:

> We have surpassed our wildest expectations

> She has surpassed her wildest expectations.

2) Intervening phrases and clauses do not affect the subject-verb agreement.

Correct: Only one of the classes was cancelled.

Incorrect: Only one of the classes were cancelled.

The subject "one" is singular and requires a singular verb. The intervening phrase "of the classes" does not alter the number or person of the verb.

3) When the subject and verb are reversed, they must still agree in both number and person.

Both of the following sentences are correct:

> Attached are copies of my travel receipts.

> Copies of my receipts are attached.

c) Modifiers

1) A modifier should be placed as close as possible to what it modifies.

Incorrect: Following are some useful tips for protecting your home from the police.

In the first statement, the placement of the modifier implies that the police are a threat to your home.

2) When a phrase begins a sentence, make sure it modifies the subject of the sentence.

Correct: Coming from the mall, I saw Christmas

lights on a few houses.

d) Parallelism

1) When two adjectives modify the same noun, they should have similar forms.

Solutions to Sentence Correction Questions

1. Choice c is correct. The phrase "but also" implies a contrast, but the original does not contain a contrast. Choice c contains the simple conjunction "and", which correctly joins the parallel ideas. The other answer choices include "also", which is superfluous.

2. Choice a is correct. The error in the original sentence is faulty parallelism. Only Choice a has both elements in the same form, "join rather than

continue". Choice b is incorrect because it uses the incorrect phrase "convince about"

3. Choice b is correct. The first part of the sentence is correct (from "although" to "colleagues"). The error is the use of the word "and", which does not logically connect the writer's modesty to her failure to get published. Choice b supplies the connection

4. Choice A is correct. The original statement is correct, while each of the answer choices contain errors in verb tense or subject/verb agreement.

5. Choice a is correct. The original sentence contains a misplaced modifier. Choice a places the modifier closer to the element it modifies. The remaining choices make unnecessary changes that result in awkward sentences.

6. Choice b is correct. The phrase "of using" is parallel to the phrases "of using" and" by planting" in the original statement. Choice b also uses the past perfect "had obtained" to correctly express that the spying was a past action that occurred before the fraternity rushing.

7. Choice d is correct, as it provides the correct structure "not so much by....as by....".

8. Choice a is correct. Stacey is the singular subject of the sentence, which requires a singular verb. The phrase about her closest friends is parenthetical and does not affect the singular verb.

9. Choice c is correct, as it contains correct parallelism (aligning films from the 40's with films from today). Choice a achieves parallelism, but includes an incorrect verb.

10. Choice b is correct. The introductory phrase must modify the people who made the discovery. "It" is impersonal and not the correct subject. Choice c is a distant second choice, but its structure is awkward and inferior to Choice b.

PUNCTUATION

Steps

1. End your sentences with a period (full stop), question mark, or exclamation point (exclamation mark or shout mark)
   - Use the period (full stop) to denote a full stop at the end of a statement. The period (.) is one of the most commonly used punctuation marks
     - *The accessibility of the computer has increased tremendously over the past several years.*
   - The question mark (?), used at the end of a sentence, suggests an interrogatory remark or inquiry.
     - *What has humanity done about the growing concern of global warming?*
   - The exclamation point (exclamation mark, shout mark)(!) suggests excitement or emphasis in a sentence
     - *I can't believe how difficult the exam was!*
2. Use the semicolon and colon properly.
   - The semicolon (;) has a few uses
     - Use a semicolon to separate two related but independent clauses. Note that, if the two clauses are very wordy or complex, it is better to use a period instead
       - *People continue to worry about the future; our failure to conserve resources has put the world at risk.*
     - Use a semicolon to separate a complex series of items, especially those that contain commas.
       - *I went to the show with Jake, my close friend; his friend, Jane; and her best friend, Jenna.*
   - The colon (:) has multiple uses.
     - Use the colon to introduce a list. Be careful not to use a colon when denoting a regular series. Usually, the word *following* suggests the use of a colon. Use only after a noun.
       - *The professor has given me three options: to retake the exam, to accept the extra credit assignment, or to fail the class.*
       - INCORRECT - *The Easter basket contained: Easter eggs, chocolate rabbits, and other candy.*
3. Understand the differences between a hyphen and a dash.
   - The hyphen (-) was once a common punctuation mark on typewriters, when a long word might have been split between two lines. The hyphen is still used in a number of other areas:

- Use a hyphen when adding a prefix to some words. The purpose of this hyphen is to make the word easier to read. If you were to leave the hyphen out of a word like *re-examine*, it would be *reexamine*, which would be harder to read. Understand that some words do not require a hyphen to separate the prefix from the word, such as *restate*, *pretest*, and *undo*. Let a dictionary be your guide for when to use the hyphen after a prefix.
    - *Cara is his ex-girlfriend.*
- Use hyphens when creating compound words from separate words.
    - *The up-to-date newspaper reporters were quick to jump on the latest scandal.*
- Use a hyphen when writing numbers out as words. Separate the two words of any number under one hundred with a hyphen.
    - *There are fifty-two playing cards in a deck.* ("The amount is one hundred and eighty." is a common error; "and" between numbers denotes a decimal point).
        - Be careful with spelling out numbers above one hundred—if the number is used as an adjective, it is completely hyphenated, since all compound adjectives are hyphenated (*I have one-hundred tapes*). Otherwise, a hyphen should only occur if a number <100 occurs within the larger number, e.g., *He lived to be one hundred twenty-one.*

o The **dash** (– or —) should be used when making a brief interruption within a statement, a sudden change of thought, an additional comment, or a dramatic qualification. It can also be used to add a parenthetical statement, such as for further clarification, but should still be relevant to the sentence. Otherwise, use parentheses. Keep in mind that the rest of the sentence should still flow naturally. Try to remove the statement within the dash from the sentence; If the sentence appears disjointed or does not make sense then you may need to revise. There should be spaces before and after the dash in British English.

- *An introductory clause is a brief phrase that comes—yes, you guessed it—at the beginning of a sentence.*
- *This is the end of our sentence—or so we thought.*

4. Use the double quotation mark and single quotation mark/apostrophe for different purposes.

o The **double quotation** (") encloses a direct quotation, whether made by a person or taken from a piece of literature.

- *"I can't wait to see him perform!" John exclaimed.*
- *According to the article, the value of the dollar in developing nations is "strongly influenced by its aesthetic value, rather than its face value."*

o The **single quotation mark or apostrophe** (') has a variety of uses.

- Use the apostrophe together with the letter *s* to **indicate possession**. Be aware of the difference in using an apostrophe with singular or plural nouns. A singular noun will use **'s**, whereas the plural version of that singular noun will use **s'**. Also, be mindful of nouns that are always considered to be plural, such as *children* and *people* — here, you should use **'s**. Be aware of pronouns that are already possessive and do not require apostrophes, such as *hers* and *its* (*it's* is used only for the contraction of *it* and *is*). *Their* is possessive without apostrophe or *s*, except as a predicate adjective, where it becomes *theirs*.
    - *The hamster's water tube needs to be refilled.*
        - A singular noun with possession.

- *In the pet store, the hamsters' bedding needed to be changed.*
    - A pluralized singular noun with possession.
- *These children's test scores are the highest in the nation.*
    - A plural noun with possession.
- Use the apostrophe to combine two words to make a contraction. For example, *cannot* becomes *can't*, *you are* becomes *you're*, and *they have* becomes *they've*.
- Use the single quotation mark within a regular quotation to indicate a quotation within a quotation.
    - *Ali said, "Anna told me, 'I wasn't sure if you wanted to come!'"*
- Note that an apostrophe is not used with 's' to make a plural noun from a singular. This is a very common mistake and should be avoided.
    - CORRECT - apple → apples
    - INCORRECT - apple → apple's

5. Indicate a break or pause within a sentence with the comma (,). This is another commonly used punctuation mark. There are several instances where you might use a comma:
    - Use the comma when denoting an appositive, or a break within a sentence that supplements and adds information to the subject.
        - *Bill Gates, CEO of Microsoft, is the developer of the operating system known as Windows.*
    - Use the comma when denoting a series. This is a set of three or more "list" items within a sentence. To save space in newspapers, some writers may omit the last comma.
        - *The fruit basket contained apples, bananas, and oranges.*
        - *The computer store was filled with video games, computer hardware and other electronic paraphernalia.*
    - Use a comma if your subject has two or more adjectives describing it. This is somewhat similar to a series, except that it is incorrect to place a comma after the final adjective.
        - INCORRECT - *The powerful, resonating, sound caught our attention.*
        - CORRECT - *The powerful, resonating sound caught our attention.*
    - Use a comma when referring to a city and state. It is also necessary to use a comma to separate the city and state from the rest of the sentence.
        - *I am originally from Freehold, NJ.*
        - *Los Angeles, CA, is one of the largest cities in the United States.*
    - Use a comma to separate an introductory phrase (which is usually one or more prepositional phrases) from the rest of the sentence. An introductory phrase briefly introduces the sentence, but is not part of the sentence's subject or predicate, and it therefore should be separated from the main clause by a comma.
        - *After the show, John and I went out to dinner.*
        - *On the back of my couch, my cat's claws have slowly been carving a large hole.*
    - Use the comma to separate two independent clauses. Having two independent clauses in a sentence simply means that you

sentence contains two independent clauses that are separated by a conjunction (such as *and*, *as*, *but*, *for*, *nor*, *so*, or *yet*), place a comma before the conjunction

- Ryan went to the beach yesterday, but he forgot his sunscreen
- *Water bills usually rise during the summer, as people are thirstier during hot and humid days.*

- Use a comma when making a direct address. When calling one's attention by name, separate the person's name and the rest of the statement with a comma. Note that this kind of comma is used rarely in writing, because this is something that we do normally while speaking.
  - *Amber, could you come here for a moment?*
- Use a comma to separate direct quotations. A comma should come after the last word before a quotation *that is being introduced*. It is not necessary to use a comma in an indirect quote. A comma is usually not necessary if you are not quoting an entire statement.
  - *While I was at his house, John asked me if I wanted anything to eat.*
    - An indirect quotation that does not require a comma.
  - *While I was at his house, John asked, "Do you want anything to eat?"*
    - A direct quotation.
  - *According to the client, the lawyer was "lazy and incompetent."*
    - A partial direct quotation that does not require a comma.

6 Understand the difference between parentheses, brackets, and braces.

- Use parentheses (( )) to clarify, to place an afterthought, or to add a personal comment. Be sure to include the period *after* the closing parenthesis.
  - *Steve Case (AOL's former CEO) resigned from the Time-Warner board of directors in 2005.*
    - Used for clarification. Here, commas can replace the parentheses.
  - *You will need a flashlight for the camping trip (don't forget the batteries!).*
    - An afterthought. Note that the period (full stop) follows the last parentheses — *not before the first.* Also note that replacing the parentheses with a comma may not be entirely suitable here, and is better off with a period or a semicolon. And that if the parenthetical thought is an "independent" one, perhaps it should be a sentence in itself. In the above example: "...the camping trip. (Don't forget the batteries!)"
  - *Most grammarians believe that parentheses and commas are always interchangeable. (I disagree.)*
    - A personal comment.
- Use brackets ([ ]) to signify an editor's note in a regular piece of writing. You can also use brackets to clarify or to revise a direct quote so that it appeals to your own writing. Brackets are often used to encompass the word "sic" (Latin for *thus*), suggesting that the previous word or phrase was written "as is", with the error intended to be displayed.
  - *"[The blast] was absolutely devastating", said Susan Smith, a local bystander at the scene of the incident.*

- *"It was absolutely devastating!"* – the actual quote by Susan Smith.
- *The English professor's report read, "Their [sic] are too many problems in the [sic] department."*

o Braces ({ }) are most widely used in denoting a numeric set in mathematics. Though generally uncommon, braces can also be used in regular writing to indicate a set of equal, independent choices.

- { 1, 2, 5, 10, 20 }
- *Choose your favourite utensil { fork, knife, spoon } and bring it to me.*

Tips

- If you write in a professional capacity, be sure to follow any guidelines or style guides provided by your employer. In some cases, their rules can be at odds with what you read here or elsewhere, but their rules always take precedence. For example, some companies use serial commas (a, b, and c) and others do not (a, b and c).
- Many grammar experts believe that parentheses and commas are often interchangeable when setting off information. While this is sometimes true, there are some cases where a set of parentheses might be more suitable, such as in indicating one's personal thought.
- Although dashes and parentheses have similar uses, remember that parentheses indicate a stronger "side notion" than dashes.
- There are exceptions to the hyphen-dash rule. In making compound words, when one of the words is itself composed of two words, use an *en dash* (–) rather than a hyphen, as in, "He took the Paris–New York route." En dashes are also used between numbers, as in page numbers or years, to denote a range. ("A discussion on personal finance is found in pages 45–62.")
- The placement of punctuation marks before or after a closing quotation mark varies. American English leaves the punctuation mark inside the quotation if it is part of the quotation, "like so." (Commas and periods (full stops) are always put inside the quotation marks for a sentence in American English, regardless of whether the quotation has punctuation at the end. Other types of punctuation marks are put outside the quotation if they are not part of the quotation.) British English tends to leave the punctuation mark outside the quotation, "like so".
    - o At times, British English will switch back and forth between the inside and outside depending on the context. For example, interrogative quotations may keep the question mark inside the quotation, as in, "Do you like this question?"
- In formal writing, try to avoid excessive use of question marks and exclamation points. Most of your sentences should be declarative statements.
- Dashes are usually considered to be informal. You might want to replace the use of a dash with a set of parentheses, or even commas. Similarly, limit the frequency of dash use in your writing; they should be reserved to emphasize a couple of important points.
- If you decide against the serial comma in your work, make sure that the meaning of the sentence can stand without its use. Think about the classic example of a sentence in which the serial comma is needed: "My heroes are my parents, Mother Teresa and the Pope."
- If you find that a sentence seems to drag on, find a way to add a comma or two, so that it is easier on the reader's eyes. If a sentence becomes too long, then consider splitting it into two or more sentences.
- Never be afraid to have short sentences in your writing by splitting up long sentences that contain several points. Your reader will appreciate writing that is clear and concise with briefer statements, as opposed to a one-page paragraph with twenty words per sentence.

DIRECT/INDIRECT

Reported Speech (Indirect Speech)

If we report what another person has said, we usually do not use the speaker's exact word (direct speech), but reported (indirect) speech. Therefore, you need to learn how to transform direc speech into reported speech. The structure is a little different depending on whether you want to transfor a statement, question or request.

Statements

When transforming statements, check whether you have to change:

- pronouns
- present tense verbs (3rd person singular)
- place and time expressions
- tenses (backshift)

Type	Example
direct speech	"I speak English."
direct speech (no backshift)	He says that he speaks English.
reported speech (backshift)	He said that he spoke English.

Statements in Reported Speech

Pronouns

In reported speech, you often have to change the pronoun depending on who says what.

Example

She says, "My mum doesn't have time today." (Direct)

She says that her mum doesn't have time today. (Indirect)

Tenses

No backshift

Do not change the tense if the introductory clause is in Simple Present (e. g. He says). Note, however, that you might have to change the form of the present tense verb (3rd person singular).

Example

He says, "I speak English."

He says that he speaks English.

Backshift

You must change the tense if the introductory clause is in Simple Past (e.g *He said*) This is called *backshift*.

Example

He said, "I am happy." → He said that he was happy.

Direct Speech	Reported Speech/Indirect
Simple Present	Simple Past
Present Progressive	Past Progressive
Simple Past	Past Perfect Simple
Present Perfect Simple	
Past Perfect Simple	
Past Progressive	Past Perfect Progressive
Present Perfect Progressive	
Past Perfect Progressive	
Future I (going to)	was / were going to
Future I (will)	Conditional I (would)
Conditional I (would)	

The verbs *could, should, would, might, must, needn't, ought to, used to* do not normally change

Example:

He said, "She might be right."

He said that she might be right.

Place and Time expressions

For place and time expressions you have to check whether place and time are the same in direct and reported speech or not. Check out the following example:

It is Friday and you meet Jamshaid at a restaurant. Jamshaid tells you that he saw Hina in this restaurant today. ("I saw Hina here today.") A few minutes later, Iffat joins you and you want to report what Jamshaid has told you. Place *(here)* and time *(today)* are the same and you can say:

→ Jamshaid said that he had seen Hina here today.

One day later, you meet Mariam at the same restaurant. Again, you want to report to her what Jamshaid has told you. The place is the same, but not the time (it happened yesterday). So you would say:

→ Jamshaid said that he had seen Hina here yesterday.

Still a few days later, Tariq rings you at home. Again, you want to report to him what Jamshaid has told you. However, now you are not at the restaurant (but at home) and a few days have passed since then. So you would say:

→ Jamshaid said that he had seen Hina at the restaurant on Friday.

→ I met Jamshaid in a restaurant on Friday and he said that he had seen Hina there that day.

Therefore you always have to think which place and time expressions are logical in a certain situation.

In the following table, you will find ways of transforming place and time expressions into reported speech.

Direct Speech	Reported Speech
today	that day
now	then
yesterday	the day before
... days ago	... days before
last week	the week before
next year	the following year
tomorrow	the next day / the following day
here	there
this	that
these	those

Questions

When transforming questions, check whether you have to change:

- pronouns
- present tense verbs (3rd person singular)
- place and time expressions
- tenses (backshift)

Also note that you have to:

- transform the question into an indirect question
- use the interrogative or *if / whether*

Type		Example
with interrogative	**direct speech**	"Why don't you speak English?"
	reported speech	He asked me why I didn't speak English.
Without Interrogative	**direct speech**	"Do you speak English?"
	reported speech	He asked me whether / if I spoke English.

Questions in Reported Speech

For pronouns, tenses and place/time expressions see statements in reported speech.

Besides, note that instead of *,that'* you use the interrogative. If there is no interrogative, use *,whether' / ,if'*.

	Direct Speech	Reported Speech
statement	He said, "She lives in Lahore."	He said that she lived in Lahore.
question with interrogative	He asked, "Where does she live?"	He asked where she lived.
question without interrogative	He asked, "Does she live in Lahore?"	He asked whether she lived in Lahore. He asked if she lived in Lahore.

It is also important that you use an indirect question in reported speech, i.e. after the interrogative or *,whether' / ,if'* you continue the sentence as if it were a statement (subject-verb etc.). The auxiliary verb *,do'* is not used in indirect questions.

Example:

He asked: "Where does she live?" (Direct)

He *asked* where she lived. (Indirect)

When transforming questions, check whether you have to change

- pronouns
- place and time expressions

Type	Example
direct speech	"Saima, speak English."
reported speech	He told Saima to speak English.

Requests in Reported Speech

For pronouns and place / time expressions see statements in reported speech. Tenses are not relevant for requests – simply use ‚to' + infinite verb.

Example:

She said, "Say hello to your mum." (Direct)

She asked me to say hello to my mum. (Indirect)

For negative requests, use *‚not to'* + infinite verb.

Example:

He said, "Don't give up, Babur." (Direct)

He advised Babur not to give up. (Indirect)

Additional Information and Exceptions

Apart from the above mentioned basic rules, there are further aspects that you should keep in mind, for example:

- main clauses connected with *and / but*
- tense of the introductory clause
- reported speech for difficult tenses
- exceptions for backshift
- requests with *must, should, ought to* and *let's*

Advanced Points

Main Clauses connected with and / but

If two complete main clauses are connected with *‚and'* or *‚but'*, put *‚that'* after the conjunction.

Example:

He said, "I saw her but she didn't see me." (Direct)

He said that he had seen her but that she hadn't seen him. (Indirect)

If the subject is left out in the second main clause (the conjunction is followed by a verb), do not use *‚that'*.

Example:

She said, "I am a nurse and work in a hospital."

He said that she was a nurse and worked in a hospital.

Tense of the Introductory Clause

The introductory clause usually is in Past Tense.

Example:

He said that ...

Present Tense is often used to report a conversation that is still going on, e. g. during a phone call or whi reading a letter.

Example:

"I am fine." – Tariq says / writes that he is fine.

The introductory clause can also be in another tense. In the following table you can see, for whic tense of the introductory clause you have to use backshift in reported speech.

No Backshift if introductory clause is in ...	Backshift if introductory clause is in ...
➢ Simple Present (He says ...) ➢ Present Perfect (He has said ...) ➢ Future I will (He will say ...) ➢ Future I going to (He is going to say ...)	➢ Simple Past (He said ...) ➢ Past Perfect (He had said ...) ➢ Future II (He will have said ...) ➢ Conditional I (He would say ...) ➢ Conditional II (He would have said ...)

Backshift in Reported Speech

The basic rules for backshift when transforming direct speech into reported speech are

Direct Speech	Reported Speech/Indirect
Simple Present	Simple Past
Present Progressive	Past Progressive
Simple Past	Past Perfect Simple
Present Perfect'	
Past Perfect	
Past Progressive	Past Perfect Progressive
Present Perfect Progressive	
Past Perfect Progressive	
Future I (going to)	was / were going to
Future I (will)	Conditional I
Conditional I	
Future II	Conditional II
Conditional II	

Exceptions

Backshift of **Simple Present** is optional if the situation is still unchanged or if you agree with th original speaker.

Aamna: "Canberra is the capital of Australia."

She said that Canberra is / was the capital of Australia.

Backshift of **Simple Past and Past Progressive** is optional if they cannot be mistakenly taken b backshift of Pr

Example:

"She left Lahore on Monday."

He said that she left / had left Lahore on Monday

Simple Past and Past Progressive do not normally change in sentences with *when / if.*

Example:

"When I was having breakfast, the telephone suddenly rang."

She said that when she was having breakfast, the telephone suddenly rang.

Example:

"If I had more time, I would learn French."

He said that if he had more time, he would learn French.

Requests

The basic rule for requests is: introductory clause + ,to' + infinite verb.

Example:

"Say hello to your mum."

She asked me to say hello to my mum.

Advise expressions with must, should and ought are usually reported using *advise / urge.*

Example:

"You must read that book."

He advised / urged me to read that book.

The expression let's is usually reported using *suggest*. In this case, there are various possibilities for reported speech; gerund or statement with *should.*

Example:

"Let's go to the cinema."

He suggested going to the cinema.

He suggested that we should go to the cinema.

ACTIVE
PASSIVE VOICE

Passive Voice

Use of Passive

Passive voice is used when the focus is on the action. It is not important or not known, however, who or what is performing the action.

Example: My bike was stolen.

In the example above, the focus is on the fact that my bike was stolen. I do not know, however, who did it.

Sometimes a statement in passive is more polite than active voice, as the following example shows:

Example: A mistake was made.

In this case, I focus on the fact that a mistake was made, but I do not blame anyone (e.g. You have made a mistake.).

Form of Passive

Subject + finite form of *to be* + Past Participle (3rd column of irregular verbs)

Example: A letter was written.

When rewriting active sentences in passive voice, note the following:

- the object of the active sentence becomes the subject of the passive sentence
- the finite form of the verb is changed (*to be* + past participle)
- the subject of the active sentence becomes the object of the passive sentence (or is dropped)

Examples of Passive

Tense		Subject	Verb	Object
Simple Present	*Active:*	Rima	writes	a letter.
	Passive:	A letter	is written	by Rima.
Simple Past	*Active:*	Rima	wrote	a letter.
	Passive:	A letter	was written	by Rima.
Present Perfect	*Active:*	Rima	has written	a letter.
	Passive:	A letter	has been written	by Rima.
Future I	*Active:*	Rima	will write	a letter.
	Passive:	A letter	will be written	by Rima.
Hilfsverben	*Active:*	Rima	can write	a letter.
	Passive:	A letter	can be written	by Rima.

Examples of Passive

Tense		Subject	Verb	Object
Present Progressive	*Active:*	Rima	is writing	a letter
	Passive	A letter	is being written	by Rima
Past Progressive	*Active:*	Rima	was writing	a letter
	Passive	A letter	was being written	by Rima
Past Perfect	*Active*	Rima	had written	a letter
	Passive	A letter	had been written	by Rima.
Future II	*Active:*	Rima	will have written	a letter
	Passive.	A letter	will have been written	by Rima
Conditional I	*Active*	Rima	would write	a letter
	Passive	A letter	would be written	by Rima
Conditional II	*Active:*	Rima	would have written	a letter
	Passive.	A letter	would have been written	by Rima.

Passive Sentences with Two Objects

Rewriting an active sentence with two objects in passive voice means that one of the two objects becomes the subject, the other one remains an object. Which object to transform into a subject depends on what you want to put the focus on.

	Subject	Verb	Object 1	Object 2
Active:	Rima	wrote	a letter	to me.
Passive:	A letter	was written	to me	by Rima
Passive:	I	was written	a letter	by Rima.

As you can see in the examples, adding *by Rima* does not sound very elegant. That's why it is usually dropped.

Personal and Impersonal Passive

Personal Passive simply means that the object of the active sentence becomes the subject of the passive sentence. So every verb that needs an object (transitive verb) can form a personal passive.

Example: They build houses. – Houses are built.

Verbs without an object (intransitive verb) normally cannot form a personal passive sentence (as there is no object that can become the subject of the passive sentence). If you want to use an intransitive verb in passive voice, you need an impersonal construction – therefore this passive is called *Impersonal Passive*

Example: he says – it is said

Impersonal Passive is not as common in English as in some other languages (e.g. German, Latin). In English, *Impersonal Passive* is only possible with verbs of perception (e. g. say, think, know).

Example: They say that women live longer than men. – It is said that women live longer than men.

Although *Impersonal Passive* is possible here, *Personal Passive* is more common.

Example: They say that women live longer than men. – Women are said to live longer than men

The subject of the subordinate clause (women) goes to the beginning of the sentence; the verb of perception is put into passive voice. The rest of the sentence is added using an infinitive construction with 'to' (certain auxiliary verbs and *that* are dropped).

Sometimes the term *Personal Passive* is used in English lessons if the indirect object of an active sentence is to become the subject of the passive sentence

SYNONYMS

Synonyms are different words with identical or at least similar meanings. Words that are synonyms are said to be synonymous, and the state of being a synonym is called synonymy. The words car and automobile are synonyms. Similarly, if we talk about a long time or an extended time, long and extended become synonyms. In the figurative sense, two words are often said to be synonymous if they have the same connotation:

Synonyms can be any part of speech (e.g. nouns, verbs, adjectives, adverbs or prepositions), as long as both members of the pair are the same part of speech. More examples of English synonyms are:

baby and *infant* (noun)

petty crime and *misdemeanor* (noun)

student and *pupil* (noun)

buy and *purchase* (verb)

on and *upon* (preposition)

freedom and *liberty* (noun)

dead and *deceased* (adjective)

Note that the synonyms are defined with respect to certain senses of words; for instance, pupil as the "aperture in the iris of the eye" is not synonymous with student. Similarly, expired as "having lost validity" (as in grocery goods) doesn't necessarily mean death.

ANALOGIES

Types of Analogies

Analogy and logic test in the exams is so challenging as well because it requires tough analysis of words and logical meanings between them. The key to finding the right answers to questions in this type of exam is understanding word meanings and analyzing the relationship between words, ideas, phrases in the given set of words.

If you know the famous game on the iphone, ipad and mobile gadgets called **4 pics, 1 word**, this type of exam is sort of like that strategy, only easier because in this type of test, you will be given choices, unlike that game, you have no choice at all but to guess the one word or thought that defines the relationship between the given photos.

Tips in getting the right answer in Analogy and Logic:

1. Determine the thought and relationship between the first set of words

SIMPLIFICATION

Solved Examples:

(1) Simplify: $5005 - 5000 \div 10$

Solution

$$5005 - 5000 \div 10 = 5005 - \frac{5000}{10} = 5005 - 500 = 4505$$

(2) Village X has a population of 68000, which is decreasing at the rate of 1200 per year. Village Y has a population of 42000, which is increasing at the rate of 800 per year. In how many years will the population of the two villages be equal?

Solution:

Let the population of the villages X and Y be equal after P years:

Then $68000 - 1200P = 42000 + 800P \Rightarrow 2000P = 26000 \Rightarrow P = 13$

So, their population will be equal after 13 years

Problems on Numbers

Solved Examples:

(1) A number is as much greater than 36 as is less than 86. Find the number.
Solution:
Let the number be $x - 36 = 86 - x \Leftrightarrow 2x = 86 + 36 = 122 \Leftrightarrow x = 61$
Hence the required number is 61.

(2) The sum of two numbers is 184. If one third of the one exceeds one seventh of the other by 8, find the smaller number.

Let the numbers be x and (184 - x).

Then $\frac{x}{3} - \frac{184 - x}{7} = 8 \Leftrightarrow 7x - 3(184 - x)$

$= 168 \Leftrightarrow 10x = 720 \Leftrightarrow x = 72.$

Problems on Trains

Solved Examples:

Important Facts and Formulae

1

(a) a km/h $= \left(a \times \frac{5}{18}\right)$ m/s

(b) a m/s $= \left(a \times \frac{18}{5}\right)$ km/h

(c) Time taken by a train of length one meter to pass a pole or a standing man or a signal post is equal to the time taken by the train to cover one meter.

(d) Time taken by the train of length one meters to pass a stationary object of length be meters is the time taken by the train to cover (1 + b) meter.

Examples:

(1) A train 100 m long is running at the speed of 30 km/hr. Find the time taken by it to pass a man standing near the railway line
Solution:

$$\text{Speed of the train} = 30 \times \frac{5}{18} = \frac{25}{3} \text{ m/sec}$$

Distance moved in passing the standing man = 100 m

$$\text{Required time taken} = \frac{100}{\frac{25}{3}} = 100 \times \frac{3}{25} = 12 \text{ sec}$$

(2) A train is moving at a speed of 132 km/hr. If the length of the train is 110 meters, how long will it take to cross a railway platform 165 meters long?
Solution:

$$\text{Speed of train} = 132 \times \frac{5}{18} = \frac{110}{3} \text{ m/sec}$$

Distance covered in passing the platform = 110 + 165 = 275 m

$$\text{Time taken} = 275 \times \frac{3}{10} = \frac{15}{2} \text{ sec} = 7\frac{1}{2} \text{ sec}$$

Problems on Ages

Solved Examples:

(1) Arshad's age after 15 years will be 5 times his age 5 years back. What is the present age of Arshad?

Solution

Let Arshad's present age be x years.

Then, Arshad's age after 15 years = (x + 15) years

Arshad's age 5 years back = (x – 5) years

x + 15 = 5 (x – 5, x + 15 = 5 x – 25 4 x = 40 x = 10

Hence: Arshad's present age is 10 years

(2) The ages of two persons differ by 16 years. If 6 years ago, the elder one be 3 times as old as the younger one, find their present age.

Solution

Let the age of younger person be the x years.

= 3 (x - 6) = (x + 16 – 6) ⇔ 3 x - 18 = x + 10 ⇔ 2 x = 28 ⇔ x = 14

Hence, their present ages are 1 years and 3 years.

Solution:

Ratio of A, B and C = Ratio of their investment
120000 : 135000 : 150000 = 8 : 9 : 10

$$\text{A's share} = 56700 \times \frac{8}{27} = \text{Rs.}16800$$

$$\text{B's share} = 56700 \times \frac{9}{27} = \text{Rs.}18900$$

$$\text{C's share} = 56700 \times \frac{10}{27} = \text{Rs.}21000$$

Solution:

Ratio of capitals of A, B and C
= 20000 x 5 + 15000 x 7 : 20000 x 5 + 16000 x 7 :
20000 x 5 + 26000 x 7
= 205000 : 212000 : 282000 : 205 : 212 : 282

$$\text{A's share} = 69900 \times \frac{205}{699} = \text{Rs.}20500$$

$$\text{B's share} = 69900 \times \frac{212}{699} = \text{Rs.}21200$$

Solved Examples:

(1) If 25 toys cost Rs.335, what do 55 toys cost?

Solution: Let the required cost be Rs.X.

Then More toys, more cost (Direct Proportion)

25 : 55 :: 335 : X ⇔ 25 x 55 = 55 x 335 ⇔

$$X = \frac{55x335}{25} = 737$$

Hence, the cost of 55 toys is Rs.737.

(2) If 36 men can do a piece of work in 25 hours, in how many hours will 15 men do it?

Pipes and Cisterns

Solved Examples:

(1) Two pipes A and B can fill a tank in 36 hours and 45 hours respectively. If both the pipes are opened simultaneously, how much time will be taken to fill the tank?

Solution.

$$\text{Part filled by A in 1 hour} = \frac{1}{36}$$

$$\text{Part filled by B in 1 hour} = \frac{1}{25}$$

$$\text{Part filled by (A+B) in 1 hour} = \frac{1}{36} + \frac{1}{25} = \frac{9}{180} = \frac{1}{20}$$

Hence, both pipes together will fill the tan in 20 hours.

Boats and Streams

Solved Examples:

Important Facts and Formulae:

(i) In water, the direction along the stream is called downstream. And, the direction against the stream is called upstream.

(ii) If the speed of the boat in still water is u km/hr and the speed of the stream is v km/hr, then:
Speed downstream = (u + v) km/hr
Speed Upstream = (u − v) km/hr

(iii) If the speed downstream is a km/hr and the speed upstream is b km/hr, then:

Speed in still water $= \frac{1}{2}(a + b)$ km/hr

Rate of stream $= \frac{1}{2}(1 - b)$ km/hr

(1) A man can row upstream at 7 km/hr and downstream at 10 km/hr. Find man's rate in still water and the rate of current.

Rate of current $= \frac{1}{2}(10\text{-}7)$ km/hr = 1.5 km/hr

(2) A man takes 3 hours 45 minutes to row a boat 15 km downstream of a river and 2 hours 30 minutes to cover a distance of 5 km upstream. Find the speed of the river current in km/hr.
Solution:

Rate downstream $= \left(\dfrac{15}{3\frac{3}{4}}\right)$ km/hr $= 15 \times \frac{4}{15} = 4$ km/hr

Rate upstream $= \left(\dfrac{5}{2\frac{1}{2}}\right)$ km/hr $= 5 \times \frac{2}{5} = 2$ km/hr

Speed of Current = $\frac{1}{2}(4-2) = 1$ km/hr

True Discount

Solv... ...% per annum. Also find the discount.

Solution:

$$\text{Present worth} = \frac{100xAmount}{100+(RxT)} = Rs.\left[\frac{100x930}{100+(8x3)}\right]$$

$$= \frac{100x930}{12} = Rs.750$$

True discount – present worth = 930 – 750 = Rs.180

(2) The true discount on a certain sum of money due 3 years hence is Rs.250 and the simple interest on the same sum for the same time and at the same rate is Rs.375. Find the sum and the rate percent.

$$\text{Sum due} = \frac{S.I.xT.D.}{(S.I)-(T.D)} = Rs.\frac{375x250}{375-250} = Rs.750$$

$$\text{Rate} = \left[\frac{100x375}{750x3}\right]\% = 16\frac{2}{3}\%$$

Solved Examples:

(1) Find the angle between the hour hand and the minute hand of a
Solution:

Angle traced by the hour hand in 12 hours = 360°
Angle traced by it in 3 hours 25 minutes

$$= \frac{41}{12} \text{ hours} = \left(\frac{360}{12} \times \frac{41}{12}\right)^{\circ} = 102\frac{1}{2}$$

Angle traced by minute hand in 60 minutes
Angle traced by it in 25 minutes

$$= \frac{360 \times 25}{60} = 150^{\circ}$$

(1) One side of a rectangular field is 15 m and one of its diagonals is 17 m. Find the area of the field.
Solution:

Other side $= \sqrt{(17)^2-(15)^2} = \sqrt{289-225} = \sqrt{64} = 8$ m

Area $= (15 \times 8)\ m^2 = 120\ m^2$

(2) Find the cost of carpeting a room 13 m long and 9 m broad with a carpet 75 cm wide at the rate of Rs.12.40 per square meter.

Solved Examples:

(1) If the height of a pole is $2\sqrt{3}$ meters and the length of its shadow is 2 meters, find the angle of elevation of the sun.

Solution:

Let angle of elevation; $\angle ACB = \theta$

Then $AB = 2\sqrt{3}$ m, AC = 2 m

$$\tan \theta = \frac{AB}{AC} = \frac{2\sqrt{3}}{2} = \sqrt{3} \Rightarrow \theta = 60^\circ$$

So, the angle of elevation is 60°.

(2) A ladder leaning against a wall makes an angle of 60° with the ground. If the length of the ladder is 19 m, find the distance of the foot of the ladder from the wall.

Let AB be the wall and BC be the ladder.

Then $\angle ACB = 60^\circ$ and BC 19 m

$$\frac{AC}{BC} = \cos 60^\circ \Rightarrow \frac{x}{19} = \frac{1}{2} \Rightarrow x = \frac{19}{2} = 9.5$$

Solved Examples:

(1) Simplify $(1024)^{\frac{-4}{5}}$

Solution.

$$(1024)^{\frac{-4}{5}} = \left(4^5\right)^{\frac{-4}{5}} = 4\,(5 \times \frac{(-4)}{5}) = 4^{-4} = \frac{1}{4^4} = \frac{1}{256}$$

(2) What is the quotient when $(x^{-1} - 1)$ is divided by $(x - 1)$?
